

Assessing Health Impacts, Costs, and Benefits of:

Cities in Depth: Case Studies

- Barcelona
- Basel
- Bradford
- Brussels
- Copenhagen
- Manchester
- Munich
- Sofia
- Utrecht
- Warsaw
- Zagreb

UBDPolicy aims to:

- Improve the estimation of health and well-being impacts and socio-economic costs and/or benefits of major urban environmental stressors
- Advance methodological approaches
- Provide good practices for urban areas to help strengthen evidence-based policy-making at city, national, and EU levels
- Effectively contribute to the development of new and existing urban planning, transport planning, and environmental policies, plans, and initiatives.
